VARIABLE RATE PRODUCTS

Product	Description	Maturity	Pricing	Prepayment Fee	Interest Calculation	Common Uses
DRC	Daily Rate Credit provides overnight or short-term funding (FHLBank Atlanta equivalent of Fed Funds)	One day to 12 months from initial borrowing. If balance is held upon maturity, member must renew to keep outstanding. 24 months available, subject to approval	Reset daily, tied to Fed Funds market	No	Actual/360 days. Payable monthly on the first business day of the month and at maturity	Manage daily funding needs Liquidity
ARC	Adjustable Rate Credit provides intermediate and long-term funding at a variable rate, generally tied to the Secured Overnight Financing Rate (SOFR) or an alternative interest rate index	Minimum maturity of three to six months. Maturities of up to 10 years available	Interest rate resets at specific intervals and is expressed as a spread to an index. With SOFR, the member will have daily rate resets with monthly or quarterly pay	Yes. Fee is equal to the greater of five basis points per annum of the amount repaid or a per annum fee equal to the difference in the spread for the advance being repaid and the spread for a new ARC advance issued on the date of repayment in the amount outstanding and for the term remaining on the advance being repaid, multiplied by the amount being repaid, each calculated on the basis of a 360 day year	Actual/360 days. Interest payable quarterly or monthly, based on index	Fund adjustable-rate loans Manage interest-rate risk
Callable SOFR Floater	Callable SOFR Floater advance provides intermediate funding at a variable rate, tied to SOFR, with the option to repay the advance in part or in whole on specified dates with no prepayment fee. The call option is Bermudan	Up to three years	Initial rate is set on trade date. Interest rate resets at specific intervals and is expressed as a spread to SOFR. Pricing varies depending on monthly or quarterly call options	No prepayment fee if paid on specified prepayment dates, subject to seven business days prior written notice. On any other day, prepayment fee equals the greater of five basis points per annum of the amount repaid or a per annum fee equal to the difference in the spread to SOFR for the advance being repaid and the spread for a new advance issued on the date of repayment in the amount outstanding and for the term remaining until the next specified prepayment date	Interest is calculated on an actual/360 day basis with daily resets, payable monthly or quarterly using simple average	Fund adjustable-rate loans Provide liquidity Manage interest-rate risk Increase liability-side flexibility

Product	Description	Maturity	Pricing	Prepayment Fee	Interest Calculation	Common Uses
FRC	<p>Fixed Rate Credit provides fixed-rate funding until the stated maturity</p> <p>For advances with terms of 12 months or greater and notional amounts of \$1 million or more, members have the added flexibility of symmetrical prepayment options and the ability to add interest rate caps or floors in certain circumstances. The cost of the caps or floors will be added to the advance rate</p>	One month to 20 years	<p>Interest rate is fixed on or before the funding date</p> <p>For advances with terms of less than 12 months or notional amounts of less than \$1 million, funding is generally available same day</p> <p>For advances with terms of 12 months or greater and notional amount of \$1 million or more, funding is generally available two Bank business days after the pricing date</p>	<p>For advances with terms of less than 12 months or notional amounts of less than \$1 million, the prepayment fee generally is equal to the present value of the daily lost cash flow to the Bank</p> <p>For advances with terms of 12 months or greater and notional amounts of \$1 million or more, the prepayment fee generally is equal to the Bank's cost of unwinding the hedged transaction, plus a cost of funds amount, plus an administrative fee</p>	Actual/360 days. Interest payable monthly or quarterly, typically based on maturity date	<p>Fund fixed-rate loans and securities</p> <p>Manage interest-rate risk</p> <p>Supplement retail deposit.</p>
PRC	<p>Principal Reducing Credit provides fixed-rate funding to the final specified maturity, with provisions for principal reductions. Amortization can be equal payments or structured with an amortization similar to a mortgage</p>	Up to 20 years with amortization periods of up to 30 years	<p>Interest rate is fixed on or before the funding date at the weighted average rate for a FRC advance maturing on the same scheduled principal reducing dates. The Bank reserves the right to assess a \$250 fee in connection with the consolidation of multiple PRC advances into a single PRC advance. This fee will apply to each advance that is consolidated</p>	Yes, same as FRC	Actual/360 days. Interest payable on reduction date and at the expiration date	Match fund loans (or pool of loans) as well as investments that have periodic repayment of principal
CIP	<p>Community Investment Program advances provide funds to support housing for households with incomes at or below 115 percent of area median income (AMI). Available as fixed-rate or principal reducing product</p>	12 months to 20 years	Based on the Bank's cost of funds, plus the administrative costs of the advance. Pricing is generally on a reduced-rate basis	For CIP advances with terms of 12 months or greater and notional amounts of \$1 million or more, the prepayment fee generally is equal to the Bank's cost of unwinding the hedged transaction, plus a cost of funds amount, plus an administrative fee	Based on structure of the advance – refer to FRC or PRC	Fund purchase, construction, and rehabilitation or refinancing of housing-related projects

3	Product	Description	Maturity	Pricing	Prepayment Fee	Interest Calculation	Common Uses
